

About Smart Food Safe

- SaaS Quality Management for global food & beverage.
- Manages audits, certifications, and non-conformances.

User: QA Manager

- Tracks 50–500+ suppliers for compliance.
- High-stress, time-sensitive workflow.
- Needs extreme speed and data clarity.

The Problem

- Scattered Comms. Queries lost in emails and sheets.
- Missed Renewals. Manual cert tracking causes liability.
- Lost History. Supplier history vanishes with turnover.
- Zero Visibility. No real-time status of pending items.

Goal

- Provide QA Managers a fast, centralized hub to: View compliance, raise structured queries, and track resolution.

Information Architecture

The structural backbone defining navigation hierarchy, user flow, and data placement across every screen.

Module Scope — 3 Deliverable Screens

The assignment requires 3 specific interfaces. 1. Dashboard, 2. Query Tracking, and 3. Raise Query Form. Action modals (like Raising new queries) and deep-dive reading are integrated logically into primary workflows to reduce cognitive friction.

Screen 1 - Supplier Dashboard

Unified Navigation Bar

- Top Row: Global Tools (Profile, Notifications)
- Secondary Row: Module Controls (Tabs, Search, Actions)

KPI Strip

- Open Queries, Critical Priority, Expiring Certificates

Two-Column Layout

- LEFT: Supplier Compliance Overview
- RIGHT: Recent Queries

Screen 2 - Query Management

Filter Bar

- Filter items to sort queries by pending, in review, resolved, and rejected

Left Panel - Master List of queries

- Noise Free List of Queries including company Name and query subject

Right Panel - Detail View

- Streamlined Header (Subject, Supplier, QA Assignee, Action Button, Attachements)
- Chat display
- Chat message window

Screen3 -Raise New Query Form Modal

Details

- Supplier selector
- Query Category (dropdown)
- Subject Line
- Rich Text Editor Description
- Action buttons - Cancel, Send to Supplier

Navigation & User Flow Map

Mapping the sequential path and module intersections. The diagram emphasizes how structural context is maintained without unnecessary page-hopping.

```
graph TD; Home[Home Login] --> S1[Screen 1 Dasbhoard]; Home --> S2[Screen 2 Query Management]; S1 --> R1[Raise New Query Actin Button]; S1 --> C[Compliance Table]; S1 --> Q[Queries Table]; S2 --> R2[Raise New Query Actin Button]; S2 --> D[Detailed view of query]; R1 --> R3[Raise New Query Form Modal]; R2 --> R3; C --> R3; D --> R3;
```

Peanut Cross-Contact Disclosure – Product Line 4B

Pillsbury Mills

Priya Vasuki

Active: 2025-04-17

📎

allergen_protocol_management.pdf

Priya Vasuki (QA)

10 Apr, 03:00 PM

Please confirm whether Product Line 4B is manufactured in a facility that also processes peanuts. This is required for our allergen declaration update.

Pillsbury Mills

10 Apr, 03:10 PM

Confirmed — Product Line 4B runs on a dedicated line. However, the raw material storage area is shared. We have attached our internal allergen management protocol for your review.
