

The Future of Recruitment Technologies 2021-22

Streamline the recruitment process

Thanks to our great sponsors:

Most organizations are struggling with talent acquisition

report that the quality of their hires is **above average** or **excellent**

say their cost of hire is **above average** or **excellent**

say the same about the **time** to fill a position

say it takes **nine weeks or more** to fill a senior-level position

TA tech could be a reason why so many are struggling

42%

say their talent acquisition technologies are **good** or **excellent**

24%

say their talent acquisition technologies are **below average** or **poor**

Only three talent-acquisition-related technologies are used by more than half of respondents:

applicant tracking systems (ATS)

background checking

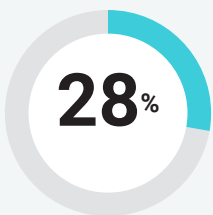

video conferencing

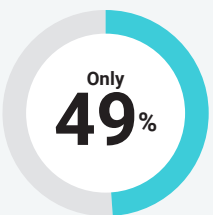

Worryingly, more than a third say their ATS sometimes **FILTERS OUT** potentially good candidates by mistake

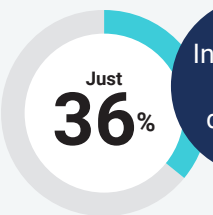

Mobile or AI technologies are not yet widely adopted for recruitment purposes

report that the quality of their hires is **above average** or **excellent**

say their cost of hire is **above average** or **excellent**

say the same about the **time** to fill a position

In fact, 48% actively disagree!

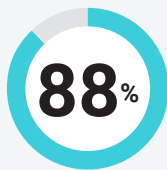

Top three features HR pros would like to see in an AI-powered TA application are the ability to:

- 1 assess
- 2 predict
- 3 personalize

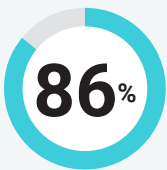

Most expect TA to change over the next two years

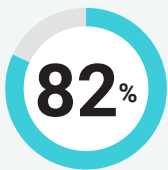

The large majority expect change to a **moderate or great extent** over the next two years in the areas of:

talent acquisition tools and technologies

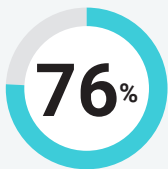

online sources used for talent acquisition

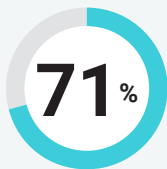

talent acquisition methods and practices

Further, respondents **agree or strongly agree** that, over the next two years:

TA technologies will become more useful

There will be greater emphasis on hiring diverse candidates

How do recruitment technology leaders* differ?

When compared with recruitment technology laggards, recruitment technology leaders are:

7X

more likely to have excellent **time-to-fill** outcomes

nearly
3X

more likely to have excellent **quality-of-hire** outcomes

more than
2X

as likely to have excellent **cost-of-hire** outcomes

Consider these strategies

Evaluate TA success

Identify bottlenecks in time-to-fill

Expand the range of talent acquisition technologies you use

Audit your ATS to ensure it isn't filtering out good candidates

Gauge the effectiveness and cost effectiveness of different methods and technologies

Go mobile

About the Survey

The survey, called "The Future of Recruitment Technologies," ran in the fourth quarter of 2021. There were responses from 214 HR professionals with 146 responding to every question. The participants represent a broad cross-section of employers by number of employees, ranging from small businesses with under 50 employees to enterprises with 20,000 or more employees. The majority of respondents represent organizations with 500 or more employees. Questions for the survey were guided by an independent panel of recruitment technology experts whom we thank for their invaluable insights.

The HR Research Institute tracks human resources trends and best practices. Learn more at hr.com/hrresearchinstitute
